Artificial Intelligence Bootcamp avec BeCode (en anglais)

RÉF | 8185

OBJECTIF ET CONTENU

Objectif

During the training session, candidates will discover all the hidden paths inside Artificial Intelligence and gain fundamental technical knowledge in development, algorithms, principles of machine learning and deep learning. Once these bases are acquired, our goal is to provide the means for people to find their career path.

After the training you can follow the path to become a Data Analyst, Data Scientist, Data Engineer or Machine Learning Engineer.

Programme

Warning: This training is provided in English

!!! As a result of the public health mesures, this training will be provided in a blended learning format, ie. a mix between online training and sessions on Becode's Digital Campus !!!

Tech Skills

You will learn to acquire, analyze and understand data. You will learn to prepare and clean them in order to make predictions. You will be introduced to Machine Learning / Deep Learning / Natural language processing (understanding of the natural human language), to Computer Vision (object recognition / tracking) and chatbots.

Soft Skills

A professional AI Data Operator needs a deep understanding of a client's needs and activities and must learn to communicate technical concepts to a customer who isn't a specialist in the field. Therefore, you will learn to speak in public, to collaborate smoothly, to be agile and to manage a project from A to Z.
Moreover, all BeCode graduates grow these soft skills:

- Autonomous self-learner
- Team player

- Reliable
- Solution Mindset
