Cyber Sécurité / DevSecOps Specialist & Administrateur de système avec BeCode

RÉF | 8407

OBJECTIF ET CONTENU

Objectif

After a 7 months intensive free training, you will be able to help companies to deploy and maintain secure applications and services.

After the training you can become a System Administrator, Security Specialist, DevOps Specialist or CloudOps Specialist.

Programme

Warning: This training is provided in English

!!! As a result of the public health mesures, this training will be provided in a blended learning format, ie. a mix between online training and sessions on Becode's Digital Campus !!!

Tech Skills

You will learn to take in charge the entire development process, from actual coding, passing by automation of testing and building, to security concerns. You will learn to build a complete pipeline for projects.
The target skills touch these topics: Terminal, Shell Scripting, Server Fundamentals, Secure Programing, Server Infrastructure, Python, Continuous Integration, Virtualization, Cloud Management, Web API Management.

Soft Skills

A professional needs a deep understanding of a client's needs and activities and must learn to communicate technical concepts to a customer who isn't a specialist in the field. Therefore, You will learn to speak in public, to collaborate smoothly, to be agile and to manage a project from A to Z.
Moreover, all BeCode graduates grow these soft skills:

- Autonomous self-learner
- Team player

- Reliable
- Solution Mindset
