

Data Science Boot Camp (8425)

Document imprimé à partir de dorifor.be.

Vous pouvez rencontrer un conseiller sans rendez-vous à la Cité des métiers, Avenue de l'Astronomie 14, 1210 Bruxelles (métro Madou), lundi, mardi, mercredi et vendredi de 9h30 à 12h30 et de 13h30 à 16h, jeudi de 13h30 à 19h (jusqu'à 16h pendant les vacances scolaires).

Get the fundamentals of Artificial Intelligence (A.I.) in a Data bootcamp divided in 2 parts

Objectif et Contenu

Objectif At the end of the training, the objective is to have the students ready to tackle the most challenging data issues with different tools and techniques.

The training format is coached MOOCs (massive open online courses). This approach allows to learn at everyone's own pace with the help of a coach.

You need to pass a certification at the end of every MOOC to confirm the master key concepts.

Every week, a dedicated coach is available to support each MOOC.

It is expected that you will only follow MOOC for the programming languages that you are not familiar with.

The Data Science Bootcamp is articulated in 2 parts with the obligation to succeed in the first part to be enrolled in the second part.

Programme

1. THE TECHNICAL CAMP

- Python in depth
- Machine learning
- An introduction to Stats (if required)

2. THE BUSINESS CASE CAMP

- 15 weeks of coached hands-on work on data4good projects, 30 days coaching.

On Monday and Friday, you are expected to attend classes at DigitYser.

You will be exposed to a new business case and tool set. The trainer will provide the source data, explain the business problem and present typical business questions that need to be resolved.

At the end of every topic you will be asked to present your methodology and conclusions. This approach ensures that all trainings are both business oriented and very hands-on.

On Tuesday, Wednesday and Thursday you will be invited to work at DigitYser so you can focus on a business case for your employer with the help and coaching from experienced data scientists.

Certification(s) visée(s) Technical & Business camp certification

Type de formation [Associatif](#)

Organisation

Durée For the Technical camp : 14 weeks - Business case camp : 19 weeks

Horaire temps plein

Début December 2019 to June 2020

Coût 250 euro (part 1) - Coût réduit contacter l'organisme -

Conditions d'admission

Prérequis administratif

- For young graduates who want to be fully prepared for a data scientist role
- For job seekers who are ready for a new challenge but needs first to acquire new skills
- For entrepreneurs and basically everyone interested in data science

Remarques

di-Academy commits to do every possible effort to promote all participants of this Data Science Bootcamp to future employers. The aim is that these employers pay for your seat in the Bootcamp (euro 12,500 VAT excl.). Once this fee has been paid, your obligation to follow the internship is waived.

If you are in contact with a potential employer, you need to bring them in contact with Philippe Van Impe or Adélaïde Cesbron in order to negotiate the training fee for the Bootcamp.
